## Organizations profile

**SUSTAINABILITY AT OSOTSPA**

Osotspa's focus on sustainability revolves around three core pillars: enhancing quality of life, sharing economic opportunities, and reducing environmental impacts throughout its value chain. The Company believes these lay a solid foundation for resilient business growth while readying the Company for new challenges and opportunities amid a more volatile business environment. The Company considers its employees to be an overall driving force for sustainability, forming the fourth pillar of its sustainability framework.

**SUSTAINABILITY FRAMEWORK & SUSTAINABILITY GOALS**

"Enhancing Sustainable Living"

is a commitment to enhancing the quality of life, sharing economic opportunities and reducing environmental impacts throughout our value chain.

## Verification of Suppliers Sustainability Development Programme

OSOTSPA has continually conducted the suppliers development programme throughout the communication, training, assessment and capacity building programme to all Suppliers to encourage and promote sustainability development. The assessment has been performed by Third parties and Osotspa's sustainability team at screened suppliers' site premises screened according to *Osotspa's supplier Code of conduct*. The procedure and criteria of screening base on Risks factors has been established and implemented.

In order to ensure the Supplier screening and assessment processes are performed in accordance with audit professional scheme with integrity, impartiality and no conflict of interest. Third party whom accredited as a Certification Body according to ISO/IEC17021 is invited to continually verify such processes.

| 1   | <p>Currently, the company has established procedures and criteria for evaluating and selecting suppliers based on sustainability requirements. These guidelines, along with assessment and development approaches, are documented in the Procurement Guideline P-HM-SPC-PUR-001 rev. 01 / 15.05.2024. This document serves as a framework for supplier evaluation and on-site assessments in the following years.</p> <p>However, it has been observed that further alignment is needed between the company's supplier assessment criteria and external reference frameworks such as DJSI or S&amp;P Global, particularly concerning risk factors.</p> <p>Consideration should be given to refining the criteria for classifying high-risk suppliers and determining on-site inspections based on factors such as:</p> <ul style="list-style-type: none"> <li>• Country-Specific Risks</li> <li>• Business Sector Risks</li> <li>• Commodity Risks</li> <li>• Results of internal site audits, management reviews, or previous supplier audits</li> <li>• Variations in shift patterns, work procedures, and complexity of management systems</li> <li>• Modifications since the last assessment (if any)</li> <li>• Maturity of the management system and organizational knowledge</li> <li>• Environmental issues, impact assessments, and related management systems</li> <li>• Differences in culture, language, and regulatory requirements</li> <li>• Geographical dispersion</li> </ul> <p>These considerations will help enhance supplier assessment consistency and alignment with recognized external standards.</p> | Procurement / Compliance and Sustainability Team | Supplier Screening Process |
